

Save Energy at Home

What is Energy Efficiency?

Energy efficiency is the process of using less energy to perform a task. This can be achieved through certain activities or specialised technologies.

Why be Energy Efficient?

Reduce Bills & Save Money

Reduce Carbon Footprint

Reduce Air Pollution

Protects Wildlife & Environment

Promotes Health

Promotes Recycling & Renewable Energy

Make your home more sustainable & energy efficient

1 Rainwater

Collecting and using rainwater is a great way to cut down on your water utility bills.

3 Air Drying

Over the use of tumble dryer.

5 Solar Panels

Solar is a great form of renewable energy.

7 Electronics

Switch them off when not in use. Keep your AC at 24° instead of 16°, and use a fan during cooler weather.

2 Water Hose

Water efficient hoses reduce water wastage.

4 Appliances

Use brands that are A+++ in their energy rating. Use induction hobs rather than gas stoves.

6 LED/Solar Lights

LED lights use up to 75% less energy. Switch lights off when not in use.

8 Transportation

Choose to walk short distances, and opt for carpooling. Turn off engine when not in use.

How are YOU staying green?
