Scope of Work:

- Pest management and monitoring of the following on loading sites, transport vessels, unloading sites and other identified areas:
 1. Crawling and flying insects
 2. Mammals
 3. Plants incl. seeds
 4. Molluscs
 5. Other invertebrates
- Targeted pest treatment of infestations
- Provision and management of preventive pest monitoring
- Pest control support:
 1. Inspection and treatment during loading/unloading of high-risk goods
 2. Vigilance, observation and prompt reporting of invasive birds associated with vessels
 3. Support in the implementation of the Incursion Response Protocol
 4. Chemical and non-chemical (i.e., bait stations) pest control intervention
- Assist SIF team with biosecurity checks
- Assist SIF team with biodiversity monitoring across both sites
- Delivery of a service report after each transport completion listing applied chemicals (active ingredients used), intervention/monitoring methods and any targeted pest treatment required.

Key Notes:

- Routine application and maintenance of pest control of identified risk areas within loading area(s) perimeter
- Ensure the availability of products at all times during the course of the contract
- One certified pest control technician is required throughout the operation of all outbound vessels to Assumption Island
- One certified pest control technician is required to be based on Assumption Island on a full-time basis throughout the 2-year

period on a full board basis (arrangements need to be made with Island Development Company)

Eligibility Criteria:

- A valid business license holder for “**Dealer in Pesticides**”
- Business Registration Certificate from the Pesticide Control Board
- The applicant must have resource capacity and expertise to undertake all activities listed under the scope of work
